

Calculator Policy

Updated for the 2022-2023 School Year

Students enrolled in mathematics courses are required to have a Texas Instruments Nspire CX II or Nspire CX calculator.

The TI-Nspire CX II calculator is available for purchase at most office supply stores, most large retail stores, and on Amazon.

Students should download the accompanying software onto their computer.

A software license is included with the purchase of a new TI-Nspire CX II.

*Providence does **not allow** the TI-Nspire CX **CAS** or CX II **CAS**.*

The CAS versions cannot be used on the ACT.
