

INCUBATOREDU

The INCubatoredu program transforms the traditional high school classroom into a place of collaboration and authentic, project-based learning. Teams of students work to create their own business designed to tackle real challenges and bring their ideas into the real world with personal mentorship from local business leaders. At the end of the semester, the new business owners will have the opportunity to pitch their business to real investors to make what was once only a dream a reality.

Designed by a team of successful entrepreneurs and educators, the INCubatoredu entrepreneurship curriculum can be implemented in any high school as an elective course. Throughout the semester, students will learn

- Practical critical and creative thinking
- Collaboration
- Leadership and confidence
- Resiliency and adaptability
- Problem solving

Whether students wish to pursue entrepreneurship or not, the skills developed in the INCubatoredu course will help unlock every student's potential and prepare them for an ever evolving world.

INCubatoredu works to unlock the potential in the students to create the entrepreneurs and leaders of tomorrow.
